COMMUNITY

ADVICE

“Let us help
you in these
challenging
times...”

Welcome to the Eagle 2020 Vision!

As there is a lot of uncertainty and fear within the community I have reached out to a number of key people in the region to come up with a workable plan to help support the people that need to access opportunities. This may be the elderly and vulnerable who need to improve the comfort of their homes and reduce their energy costs. We can provide efficient measures with no capital needed. There are grants of £10,000 available and we can offer free advice and support to qualifying homes.

It may be young people who have lost their jobs or need a change in career or a clear route to become an entrepreneur we have 30 jobs for 16-24 year olds in the next 3 months.

They will enter a 1000 day challenge where one of them will be rewarded with a business in their chosen field. This will be a unique opportunity to become a business leader trained by business leaders.

We will offer training and development opportunities so people can be trained on how to secure a job. We have taken 4 trainees on in the last month. We have a fitness challenge and community of people pushing each other which is free to access and has different levels to suit all ages and fitness levels. This will be delivered in partnership with St Pauls Boxing Academy who will also train all new starters as part of their development programme. Our team will be paid to train.

The people who take action with the access to the Government Green Homes Grant and progress further will be rewarded with a Love to Shop local voucher which will support independent businesses for food and healthcare. If the job progresses we will send food to our frontline NHS workers as a thank you for their brave and tireless work in these challenging times.

Register for our email list so you can receive updates and energy saving advice from the regions only whale house approach specialist. The 2020 Vision is to get as many households involved and if you take advantage of all opportunities presented then you will be one of over 5000 homes we have improved.

The EAGLE is free to use and could be a 5 stage roadmap to a better home and community as we will develop and inspire our team.

Energy funding for low income homes via Green Home Grants.

Academy for personal development and job opportunities.

Get fitter with our rolling 30 day free to enter challenges in association with St Pauls.

Love your community and NHS with our taking action and referral rewards programme.

Eagle report for free explaining how to save money via our brand new website and updates.

On a personal note there have been a lot of people affected by the loss of loved ones so we will try and develop this community project further whilst keeping the name alive of people who have gone too soon. We will train at our own Academy the Archie Brown Enterprise Centre in memory of Bransholme road traffic accident victim from April 2020.

We will raise awareness on knife crime and support the generation who are carrying knives in fear through supporting the Clean the Streets Abdullah Balouchi Foundation. We will talk about these projects on the Pandamonium Podcast which will help raise awareness, we will do our best to help support the community and improve Hull and surrounding areas. Lets all collaborate to improve our community, teamwork makes the dream work. Find out more in this newsletter and on our website www.halltech.co.uk

Get involved and lets progress together onwards and upwards. Hull and Proud.

Feed the Heroes

21st August 2020

Alex Hall
Feed the Heroes

Dear Alex,

We are writing on behalf of all of our colleagues at Hull University Teaching Hospitals NHS Trust to say thank you to you for the generous donation of meals for our night staff that you have given us during the ongoing Coronavirus pandemic.

This has been, and continues to be, a difficult and occasionally scary time for our staff and the donations we have received have really helped to improve staff morale and make us all realise how valued and loved the NHS is to our nation. This level of support has been truly astonishing and your kind and compassionate act will never be forgotten by us.

Coronavirus will be with us for some time to come, but at present we are managing effectively the numbers of patients who are coming into our hospitals. Discussions are underway as to how we gradually recommence some of our more routine services, many of which were postponed when we restructured our hospitals to cope with additional Coronavirus patients.

Once again, from the bottom of our hearts, thank you. We will always remember what you have done for us.

Yours sincerely,

Chris Long, Chief Executive

Terry Moran, Chairman

ENERGY SAVING QUICK WINS

Whether you're a homeowner, private or social renter, student, or you live at home with your parents, there are many things you can do to reduce how much energy you use and how much is spent.

1. Understand your bill

The information on a typical energy bill can be confusing, but understanding it can go a long way to helping you get to grips with your energy usage at home.

2. Switch off standby

You can save around £35 a year just by remembering to turn your appliances off standby mode.

3. Careful in your kitchen

You can save around £39 a year from your energy bill just by using your kitchen appliances more carefully.

4. Get a head

If you've got a shower that takes hot water straight from your boiler or hot water tank (rather than an electric

shower), fit a water efficient shower head. This will reduce your hot water usage while retaining the sensation of a powerful shower. A water efficient shower head could save a four person household (e.g. a family of four or even a shared student flat) as much as £38 a year on gas for water heating, as well as a further £53 a year on water bills if they have a water meter.

5. Spend less time in the shower

Spending one minute less in the shower each day will save up to £8 a year off your energy bills, per person. With a water meter this could save a further £11 off annual water and sewerage bills.

6. Draught proofing

Unless your home is very new, you will lose some heat through draughts around doors and windows, gaps around the floor, or through the chimney. Professional draught-proofing of windows, doors and blocking cracks in floors and skirting boards can cost around £200, but can save around £25 a year on energy bills.

7. Take control of your heating

More than half the money spent on fuel bills goes towards providing heating and hot water. Installing a room thermostat, a programmer and thermostatic radiator valves and using these controls efficiently could save you around £75 a year.

8. Get savvy with smart controls

Smart heating controls are the latest innovation to help you control your heating and understand your energy use. A smart meter with in-home display or energy monitor can help householders save energy by increasing awareness of energy use, helping to cut waste. Government estimates that a display or monitor could typically help reduce a household's electricity use by 2.8% and gas use by 2%.

9. Switch to LEDs

If the average household replaced all of their bulbs with LEDs, it would cost about £100 and save about £40 a year on bills.

Discover more info at:

energysavingtrust.org.uk/home-energy-efficiency/energy-saving-quick-wins

ENERGY SAVING TIPS

10. Turn off lights

Turn your lights off when you're not using them. If you switch a light off for just a few seconds, you will save more energy than it takes for the light to start up again, regardless of the type of light.

This will save you around £15 a year on your annual energy bills.

Are you a homeowner?

If you're a homeowner, you need to claim your free Eagle Report and access upto £10,000 from the Green Voucher scheme. You may also qualify for a fre boiler and first time central heating system.

Are you renting?

Potential tenants don't always apply the same level of scrutiny to their potential home as buyers. But when it comes to energy efficiency, this could be a key mistake.

Knowing is not enough, we must apply. Willing is not enough, we must do.

2000 - 2020
YOUR SPIRIT LIVES ON

Q&A with

Dr Farouk Balouchi [FB] & Alex Hall [AH]

We caught up with Dr Farouk Balouchi, a doctor of engineering, who tragically lost his son, Abdullah, in a mindless street attack in Hull.

AH: Farouk I am sorry for your loss and the Hull Community will ensure your vision for Abdullahs Name and Legacy will live on.

FB: Thank you Alex.

AH: Tell me the goal of the Abdullah Balouchi Foundation

FB: Put the knives down and pick the gloves up.

AH: What can the foundation do to achieve this?

FB: We are in discussions with a number of local Boxing Academies to put a programme together which will help to show a more positive approach and image is available.

AH: What did boxing do for Abdullah?

FB: It helped give him focus, confidence, discipline and a positive outlook on the future.

AH: How can we get behind your vision?

FB: Keep talking, raise awareness, like, share and comment on our progress and lets clean up the streets of the mindless violence through the voice of the community.
